

The PoleSaver System

What is PoleSaver ?

PoleSaver allows you to fit more antennas and dishes on existing monopoles.

Monopoles are strengthened by bolting on rods, without the need for replacing the structure.

Easy to site share

Faster projects – shorter timescales

Total Time in Weeks

More antennas - not more towers

Cost Efficient

Quicker planning

- Permitted Development Rights
- Complying with “Operator 10 commitments”.
- Smaller compound extension for other users.
- Utilizing existing towers

Cheaper than new towers

Summary of Key Benefits

- **Easy** to site share
- **Faster** project timescales
- **More** antennas – not more towers
- **Cost Efficient** method utilising **existing** built sites
- **Cheaper** than erecting a new tower

Let's look at a PoleSaver project

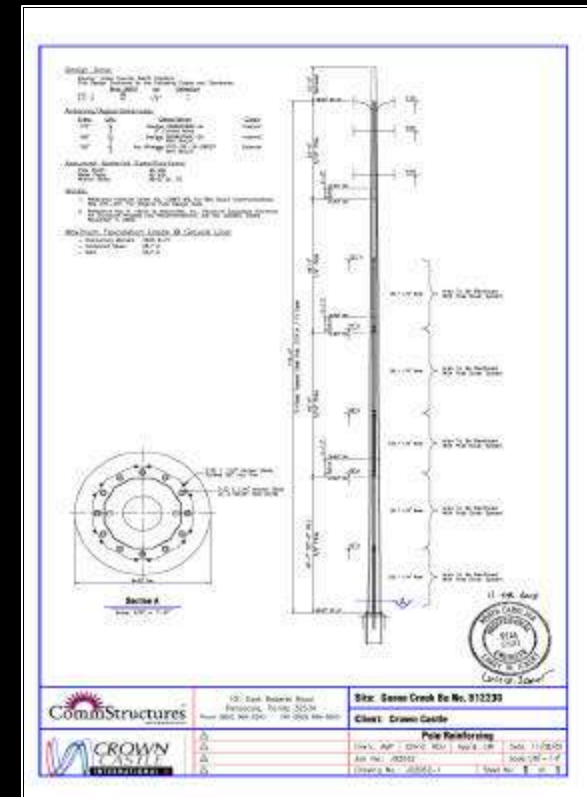

Information Required for Quote:

- Drawings, materials and calculations
- Foundation Drawing and calculations
- Geotech Report & Soil Test Results
- Existing antenna & dish heights
- Proposed Final Configuration of Dishes & Antennas

Engineering

We design the best strengthening solution for the structure.

Bolt on Connection

No Welding ...

Cable Run

Installation

Installation

Installation

Project Completed with no Downtime

Worldwide Patent

The blue countries are already patented and the white are patent pending.

2connex Services:

Turnkey Reinforcement Solutions:

- Assessment of existing structure
- Design of reinforcement solution
- Manufacturing and Installation

Additional Services:

- Construction Services
- Project Management
- Civil, Geotechnical and Structural Engineering

Why use the PoleSaver

Compared with a replacement:

- Easier
- Faster
- Cheaper
